## ABOUT ME

I am a software developer with a background in Civil Aviation Management and three years of technical experience at Equity Bank. I specialize in building web applications with strong skills in Python and Javascript. I'm passionate about data modeling, and open-source projects, and I excel in collaborating with distributed teams to deliver high-quality, secure, and scalable software solutions.

## WORK EXPERIENCE

### OPERATIONS OFFICER

Equity Bank (December 2021- February 2024)

- Streamlined processes to optimize efficiency in cheque clearing and cash management.
- Executed financial reporting and ensured compliance through accurate accruals and returns.
- Collected and managed data to enhance database accuracy, resulting in improved service delivery.
- Delivered exceptional customer service, boosting client satisfaction and retention levels.

### MARKETING AGENT

Equity bank Ltd. (2019-2021)

- Onboarding and activation of mobile banking platforms
- Managed mail and records to ensure efficient administrative operations
- Verified checks and facilitated credit and insurance sales, enhancing financial management skills
- Activated Equitel SIM cards and installed mobile banking apps, exhibiting expertise in digital banking
- Addressed customer inquiries and managed customer service, improving interpersonal communication skills

## PROJECTS

### LaxeAura

[Github](#)

An exceptional e-commerce platform that offers a diverse range of beauty products. It is expertly crafted with React and styled with Tailwind CSS.

### Recipe Haven

[Github](#)

Recipe Haven is a community-driven platform for sharing and exploring recipes. Users can create accounts, upload recipes, and interact with others' recipes through bookmarking, rating, commenting, and sharing on social media. The platform offers advanced search and filtering options for finding recipes easily.

### Let's Write

[Github](#)

A cutting-edge blogging application that enables users to effortlessly create and join channels for posting blogs. This impressive application is built with React, Flask, and SQLAlchemy, featuring robust JWT authentication for security.
